You're invited to attend a valuable technical seminar at a very special price.

Reliable Solutions Today!

Pump Curves/Applications, Installation & Troubleshooting

Sponsored by the
Western Canada Chapter
\$100 per attendee
(Lunch included)

Seminar Description

The most common machine to be driven by an electric motor is a pump. Centrifugal pumps are by far the most common devices for moving industrial liquids of all types. A thorough understanding of the design, implementation and maintenance of centrifugal pumps is essential for those working in the electric motor repair industry. This seminar provides the practical knowledge service center personnel need to address customers' pump-related motor issues, and the broader opportunities for pump maintenance, system optimization and energy savings.

Payment (\$100 per registrant)
