

Baker Reply to Question about Calibration at Kelowna AGM

Hi Rene,

Great mtg in Kelowna good job!

I spoke to Dave Stevens at Pulse Eng Ltd. regarding their status on calibration's for SKF (Baker Surge Comparison Testers).

Dave said that they are still doing the calibrations, however if there is a repair needed they have to send it into SKF in Colorado

for repairs & parts.

If you are just needing a calibration they are still ok to do them.

Hope this helps
